SwiftGuard 110, Conversant Solutions' entry level HTTP web proxy for Small and Medium Business (SMEs) and Remote Offices allows our customers to monitor and manage Internet bandwidth usage by their employees.

As business applications and enterprise traffic are increasingly shifting towards HTTP, SwiftGuard's compression and caching capabilities will also ensure that business objectives are met and end users' Internet experience are enhanced.

Business with Internet connections also requires the ability to control access to objectionable or inappropriate content. Without the necessary control, business risk productivity loss, erosion of available bandwidth and possibly legal liability.

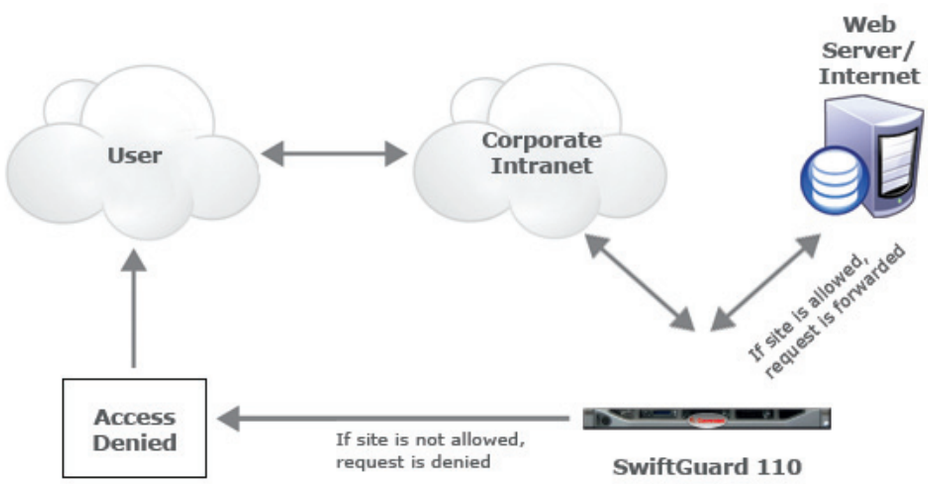
SwiftGuard comes with built-in content filtering which can eliminate many of these problems and yet satisfy customers' scalability and affordability requirements. Companies can enforce Acceptable Usage Policies through SwiftGuard's dynamic and real time URL categorization capabilities as well as extensive logging and reporting functions.

Features	Benefits
Single Appliance Solution	SwiftGuard offers a single appliance solution to secure and control web traffic risks (Security, Resources and Compliance) encountered by today's enterprise networks.
HTTP Compression	Built-in HTTP compression allows SwiftGuard to send and receive compressed text files (HTML, Javascript, CSS, etc) from origin servers, resulting in saving of 75% bandwidth and deliver better user experience.
Improved Quality of Service (QoS)	Enterprise grade web proxy stored frequently requested web content, accelerates web traffic and reduces latency, resulting in reduced bandwidth usage and ensuring end user experienced is maintained or even improved.
Acceptable Use Policy (AUP) Enforcement	AUP policies enforcement allows enterprises to make sure their network and bandwidth resources are not abused and employees' productivity are not affected by controlling employees' access to inappropriate web content.
Enterprise Grade Security Platform	Real-time protection from phishing and spyware prevent employees from unknowingly access malicious sites that contains or distribute spyware to ensure the security and reliability of enterprise network.
Regulatory Compliance	Enables enterprises to comply with government laws and regulations, reducing the risk of costly penalties and lawsuits, and safeguarding company reputation.
SwiftGuard Web Security Monitor	Offer valuable insight into overall web activity as well as threat identification and prevention within corporate networks.
Flexible Deployment	Supports installation of a single appliance or an appliance farm (unlimited scalability). Scalable solution allows enterprises to expand as needed.

Technical Specifications

Processor type	Intel® Xeon®	**Enclosure**	Rack mountable (Specific rack mount kit required).
Number of processors	1 * Processor	**Form factor**	2U rack mountable
Processor core	Dual	**Network interface**	2 * Intel Based Network RJ-45 (Ethernet)10/100/1000
Memory	2 GB	**Power supply**	1 * high efficiency power supply
Storage capacity	1 TB	**Power requirements**	100 - 240 VAC, 50/60 Hz
Storage drives	2* 500 GB SATA HDD	**Product dimensions (W * D * H)**	43.66 * 61.02 * 8.64 cm
Systems drives	2 * 160 GB SATA HDD in Raid 1	**Product weight**	16 kg

Typical Deployment



Conversant Solutions

Singapore: 112 Robinson Road, #03-01, Singapore 068902
Tel: (65) 6226 1138 Fax: (65) 6226 1381

Malaysia: B3-U2-06 Solaris Dutamas, No 1 Jalan Dutamas 1, 50480 Kuala Lumpur, Malaysia
Tel: (603) 6207 9769 Fax: (603) 6207 9781

United Kingdom: 26 Saint Thomas Place, Ely Cambridgeshire, CB7 4EX, England, United Kingdom
Tel: (44) 845 299 7354 Fax: (44) 845 280 1774
