About Conversant |  Range of Products | Career

Welcome 2011

2010 was a great year for Conversant, with major successes on both SwiftCache and SwiftServe - we'd like to thank all of our partners for making it so successful.

We're constantly innovating our products to keep them at the cutting edge in the market, which is why we are very excited to announce the release of SwiftCache 2.1 in this newsletter. Through the rest of the year we will keep you updated on new product announcements, best practices and customer success stories to make sure that 2011 is an even better year than 2010!

SwiftCache 2.1 >

The free SwiftCache 2.1 software upgrade brings our customers the most advanced media caching solution in the world. Built on top of the innovative SwiftCache platform it introduces a range of new features that ensure customers achieve best in class bandwidth savings with unparalleled stability and performance.

SwiftSense >

SwiftSense is a cloud service that analyses millions of sites from around the world to deliver a recommended set of caching policies to customers. These policies are carefully crafted to maximize cache efficiency.

[More info](#)

ICC >

Inter-cache communication (ICC) is an intelligent clustering technology that optimizes utilization of cluster resources. It dramatically improves bandwidth savings by eliminating “double-caching” across the cluster.

[More Info](#)

Overload Protection >

Protect your network infrastructure in the event of unplanned traffic spikes. SwiftCache 2.1 introduces advanced defensive mechanisms to ensure that SwiftCache operates predictably under extreme load conditions.
